

Bat-ID catches it. Can Sophie understand it?

A permit touching
her parcel is
published

Bat-ID spots it
and alerts her

Does she get it
in 5 seconds?

Bat-ID x Hack VS 2026

Owners who understand in 5 seconds, **stay**.

5 seconds = our target, inspired by the five-second test (Sova & Nielsen, The UX Five-Second Rules, 2013). Not a measured result.

The challenge: make the first minutes count.

Fewer drop-offs
in first uses

What we did.

Starting point

1

Dashboard page first

2

Parcel details in “Biens”

3

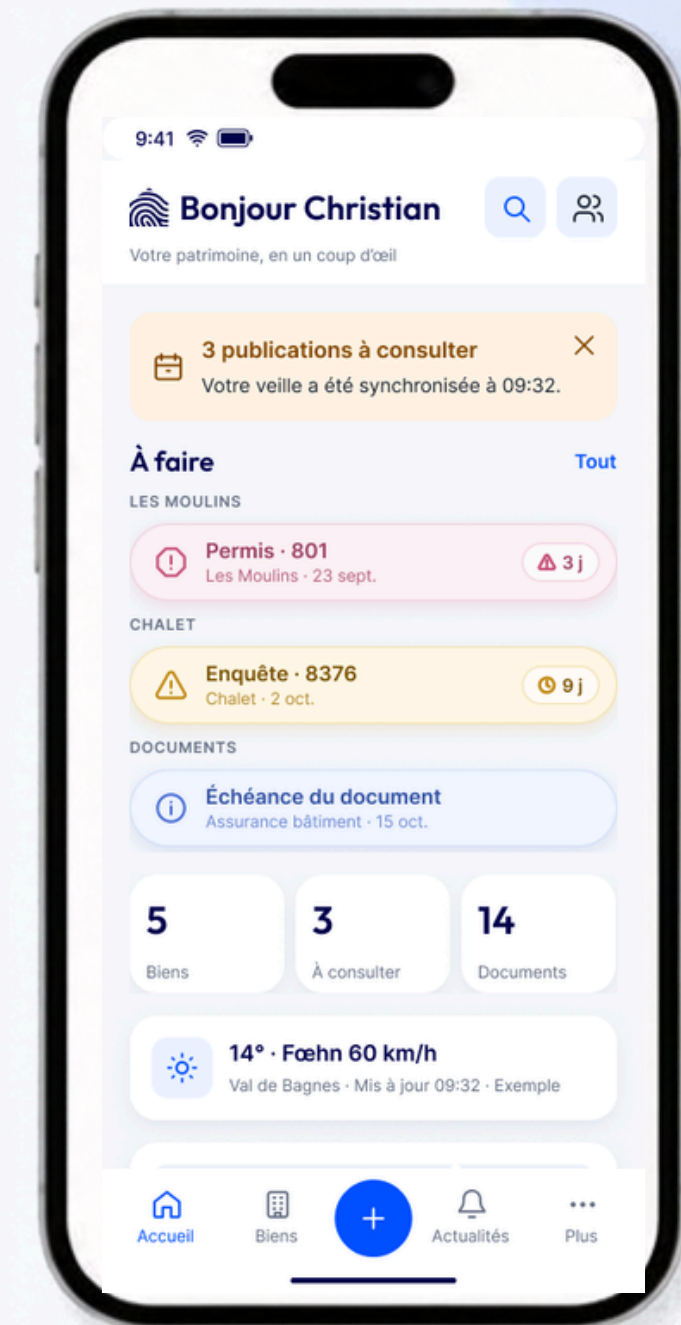

Essentiel or Detaille mode

4

Map moved, not removed

Every feature kept.

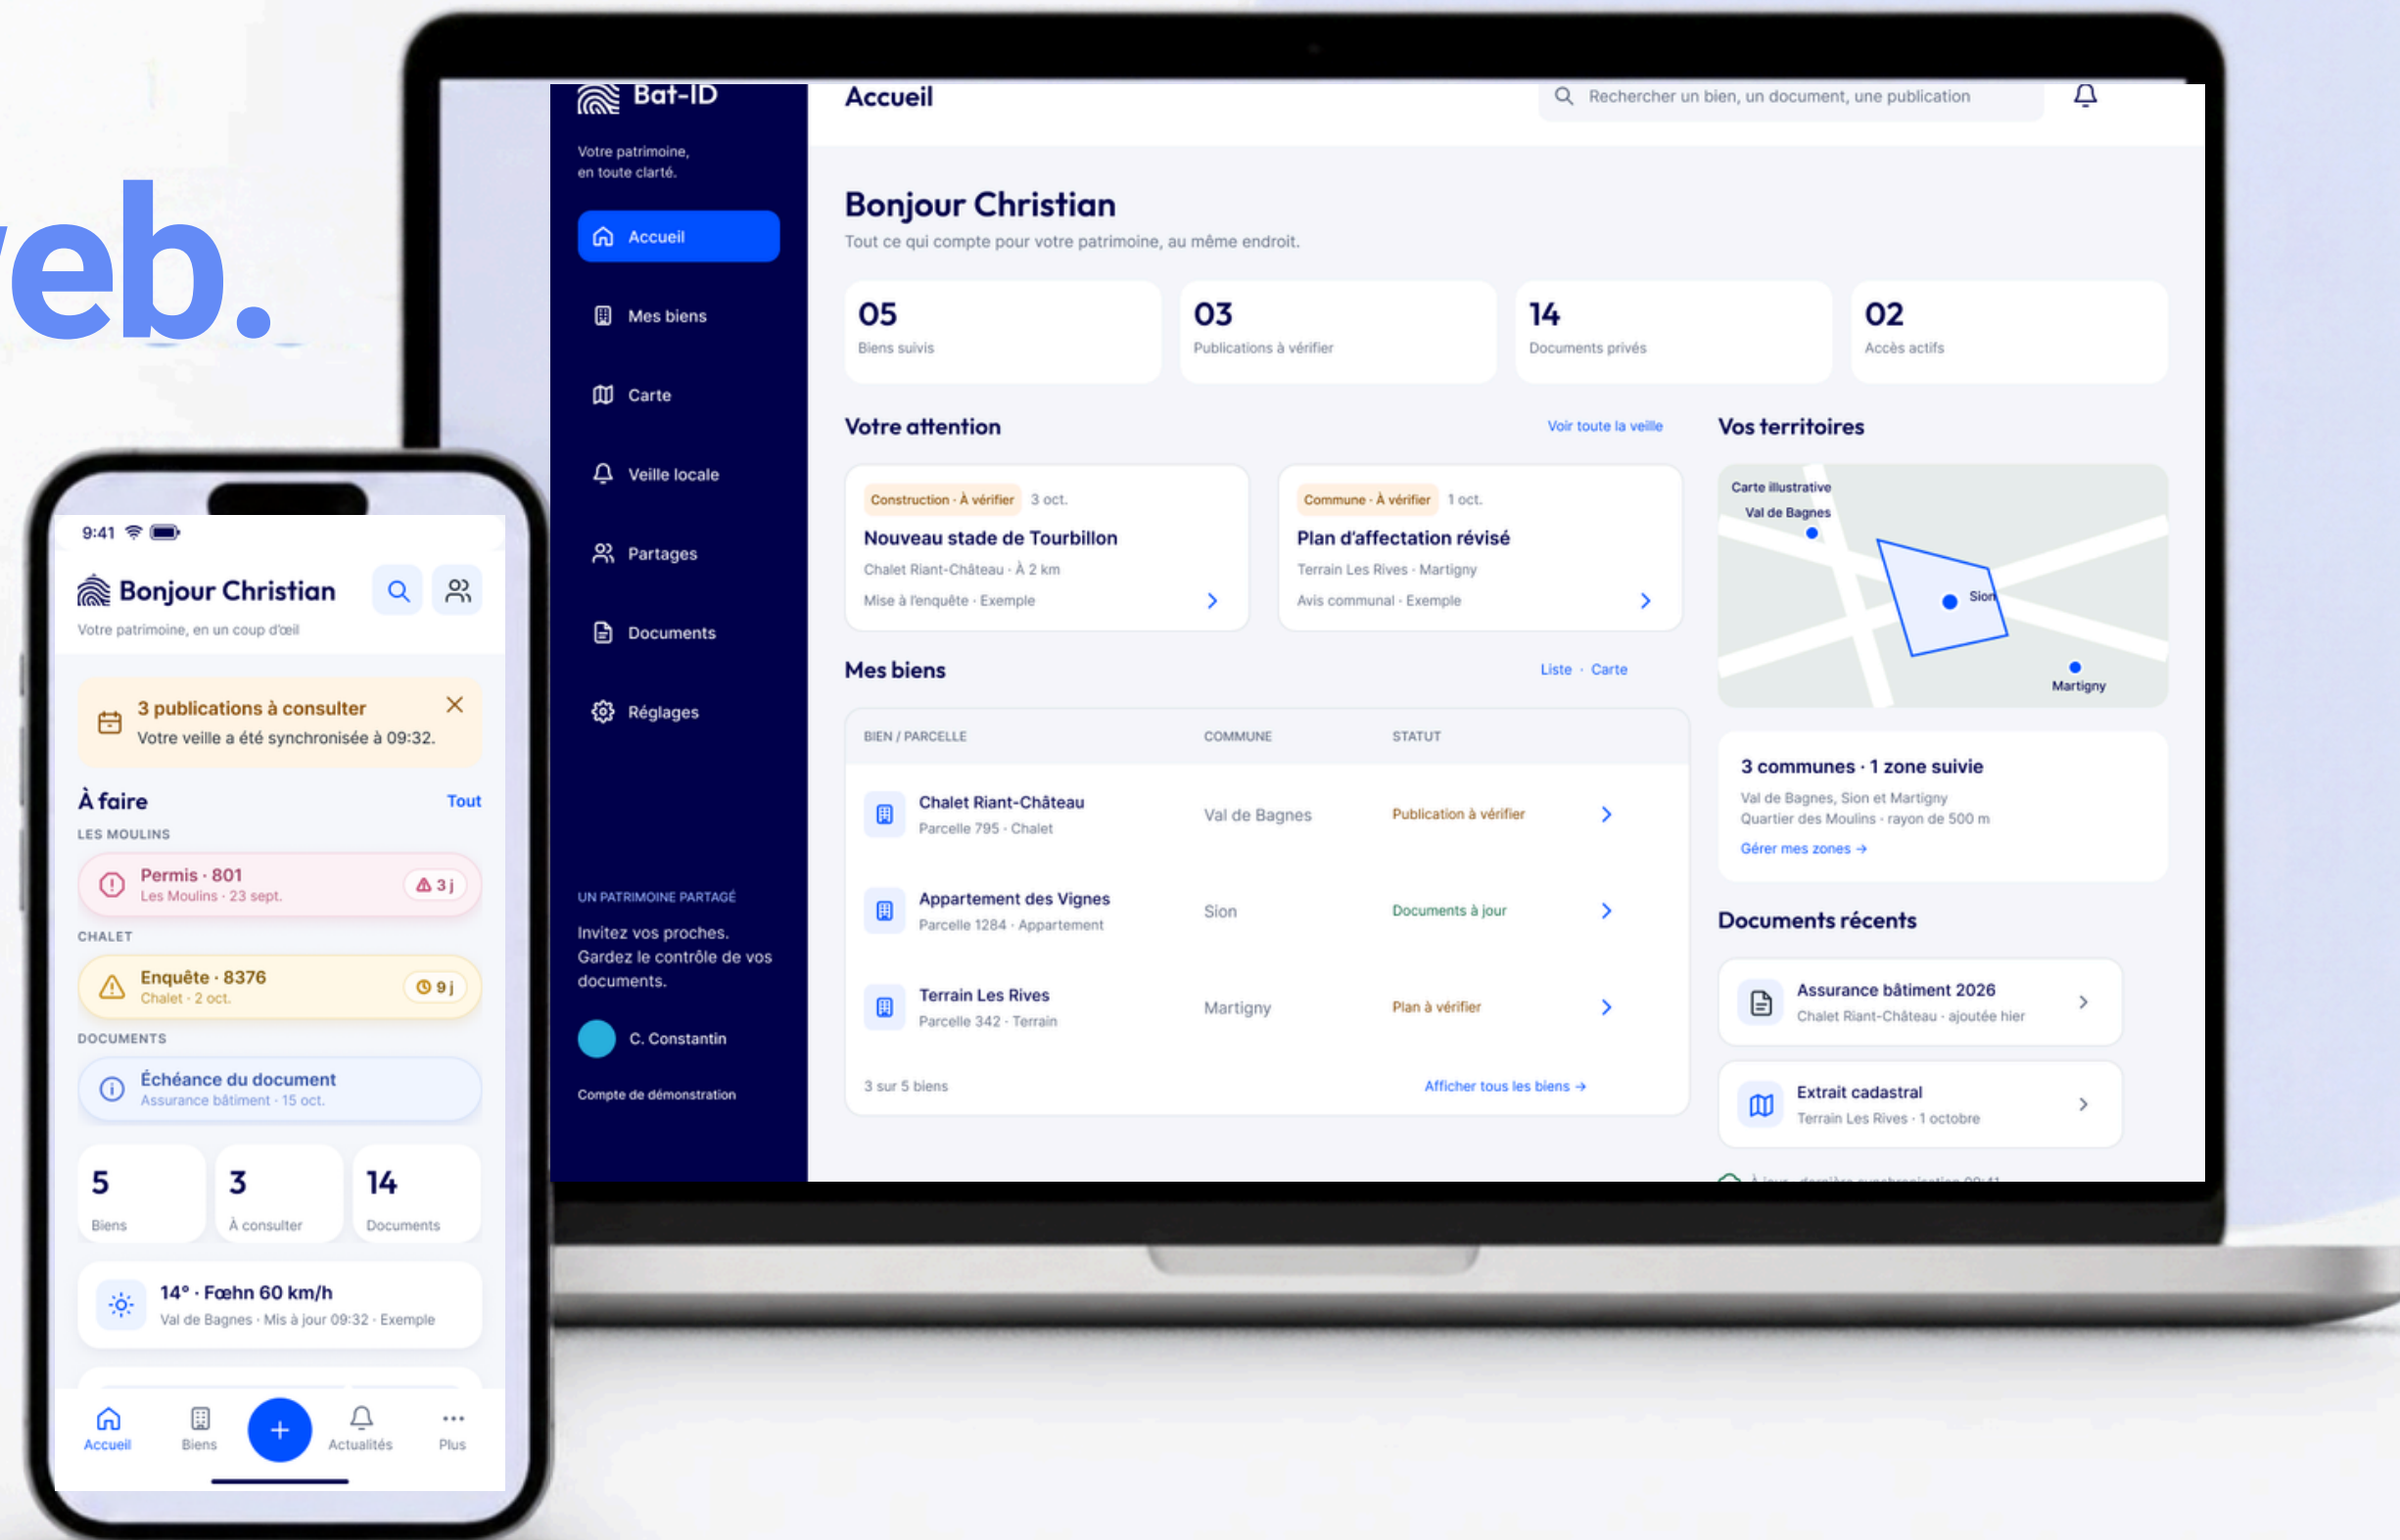

Our proposal

One logic. Mobile and web.

Mobile: the essentials
at a glance

Web: full detail,
more depth

The best fit for Bat-ID: smooth, safe, complete.

Smooth

Clear at a glance,
fast to use

Safe

Every feature kept,
no rebuild

Full

Key docs fast, all
done in-app

2 in 1

Mobile and web,
one logic

Built, not just imagined: 147 screens · 52 components · 199 interactions

Thank you, Bat-ID team.

Les disciples de St.Mudry

Merci.
